DETAILED ACTION

Response to Amendment

Applicant's amendments filed 8/21/2007 have been received and reviewed. The status of the claims is as follows:

Claims 1, 6, and 9-20 are pending. Claims 2-5, 7, and 8 have been canceled by the applicant.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claims 1, 14, 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Francis in view of Harmon and Joao (US 20020128922 A1).

Regarding Claims 1,14

Francis discloses a system and method of managing transactions with multiple affiliates, comprising:

 providing a central exchange including an exchange server and an exchange database connected thereto (at least paragraph [0014]: central processor with storage)

10/606,086 Art Unit: 3625

- storing in said exchange database information corresponding to goods and/or services available for sale and/or requested to purchase by one or more affiliates (at least paragraph [0014]: data concerning available tickets stored in central processor)
- connecting said exchange server to the affiliate computers via a distributed network (at least paragraph [0030]: data transmitted over a network)
- uploading to said central database said affiliate information corresponding to goods and/or services available for transactions via the distributed network (at least paragraph [0014]: ticket information uploaded to central processor from box offices)
- conducting real-time transactions involving said goods and/or services in said exchange database via said distributed network (at least paragraph [0023]: ticket sales conducted)
- providing Internet (world wide web) access to said exchange server;
 providing a web page and linking same to said affiliate computers (at least paragraph [0023]: Internet/WWW connection to central processor and box offices)
- preprogramming said central exchange with transaction conditions
 applicable to said affiliates and conducting transactions via said distributed
 network according to said preprogrammed conditions (at least paragraph
 [0022]: central processor facilitates ticket sales)

Page 4

Application/Control Number: 10/606,086 Art Unit: 3625

Francis does not specifically disclose:

- providing a web-based bulletin board and access thereto by said affiliates;
- posting to said web-based bulletin board information concerning goods and/or services available for purchase and/or requested to purchase through the central exchange;
- conducting affiliate-to-affiliate transactions with respect to said goods and/or services via said distributed network;
- reporting data with respect to said affiliate-to-affiliate transactions to said central
 exchange
- a transaction accounting function for automatic record insertion in said affiliates computers
- each affiliate having an affiliate computer and an affiliate database connected thereto
- storing in said affiliate databases information corresponding to goods and/or services

Harmon teaches that it is known to include providing a web-based bulletin board with postings concerning products available through a central server (at least figures 6 and 7: bulletin board for posting ticket availability) and conducting affiliate-to-transactions and reporting data with respect to the transactions to affiliate computers (at least paragraph [0011]: data about transactions between

10/606,086

Art Unit: 3625

members recorded) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Francis, with the bulletin board and transactions between affiliates, as taught by Harmon, since such a modification would have provided improved sales and profit potential for the sale of event tickets (at least paragraph [0008] of Harmon).

Joao teaches that it is known to include multiple affiliates, each with affiliate databases for storing ticket information (at least paragraph [0084] and [0104]: user communication devices and ticket issuer computers have databases that store ticket information) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Francis, with the affiliate databases, as taught by Joao, since such a modification would have provided increased profitability for ticket holders by allowing them to sell unused or undesired event tickets easily and conveniently (at least paragraphs [0007]-[0012] of Joao).

Regarding Claim 17

Francis discloses the claimed invention except for:

- enabling affiliate control of credit card purchasing of goods and/or services
 from other affiliates
- inputting to said central exchange credit card information from said
 affiliates for use in connection with affiliate-to-affiliate transactions

10/606,086 Art Unit: 3625

Harmon teaches that is known to include enabling credit card purchasing of goods between affiliates and entering credit card information to a central exchange (at least paragraph [0037]: credit card charged by exchange for member-to-member transaction) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Francis, with the credit card transactions between affiliates, as taught by Harmon, since such a modification would have provided improved record keeping of ticket transactions through an accurate audit trail (at least paragraph [0037] of Harmon).

10/606,086 Art Unit: 3625

Regarding Claim 18

Francis discloses the claimed invention except for:

- sending an affiliate purchase request from a selling affiliate to said exchange server via a web service;
- said exchange server parsing and building request documents;
- said exchange server sending said request back to said selling affiliate;
- said originating affiliate sending goods and/or services information to said exchange server concerning said request;
- said exchange server sending selling information concerning said goods and/or services to a buying affiliate;
- said buying affiliate confirming purchase to said exchange service;
- said exchange service sending a transaction confirmation to said buying affiliate;
- said buying affiliate sending a transaction confirmation to said exchange service

Harmon teaches that it is known to include sending a purchase request from a selling affiliate (at least paragraph [0009]: seller offer), parsing and building a request document and sending the request back to the seller (at least paragraph [0009] and figure 6: offer converted into posting on website and displayed to all members, including seller), seller sending information regarding goods for sale (at least paragraph [0009]: offer price and ticket information), sending selling

10/606,086

Art Unit: 3625

information to a buyer (at least figure 6: posted sell offers), and a buyer confirming an order and receiving confirmation of the order (at least figure 8 and paragraph [0011]: buyer confirms bid and exchange sends buyer order confirmation). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Francis, with the posting and ordering procedure, as taught by Harmon, since such a modification would have provided increased convenience in buying and selling event tickets by ensuring that buyers and sellers only have to deal with one entity, a central exchange (at least paragraph [0010] of Harmon).

10/606,086 Art Unit: 3625

Regarding Claims 19, 20

Francis discloses:

- wherein said goods and/or services comprise tickets to entertainment and/or sports events (at least abstract)
- wherein said tickets are specified for purchase by a purchasing affiliate by event, venue, date and seating section (at least paragraph [0029])

2. Claims 6 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Francis in view of Harmon and Joao as applied to claims 1-5, 8, 14, and 17-20 above, and further in view of Hagen (US 20020120506 A1).

Regarding claims 6, 9, 11

Francis, Harmon, and Joao disclose the claimed invention except for:

- a website plug-in adapted for enabling said affiliates to create their respective websites for connecting electronic commerce utilizing the central exchange and a distributed network;
- said website plug-in being adapted for affiliate customization of a web page header and footer;
- a default web page body including information provided by said central exchange for said affiliate web pages.

Hagen teaches that it is known to include tools for creating affiliate websites with customizable portions and default portions (at least paragraph [0204]: affiliate websites created using template to maintain look and feel, yet portions may be customized). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Francis, Harmon, and Joao, with the affiliate website creation, as taught by Hagen, since such a modification would have provided more convenience to administrators, advertisers, and end users by providing the ability

10/606,086 Art Unit: 3625 Page 12

to search for desired ads in a number of websites with conventional search tools (at least paragraph [0838] of Hagen).

10/606,086 Art Unit: 3625

Regarding Claims 10, 12

Francis, Harmon, and Joao disclose:

- multiple affiliate servers each associated with a respective affiliate
 computer; and each said affiliate computer being connected to a
 respective affiliate server; and each said affiliate server being connected
 to said exchange server via an affiliate
 application (at least paragraph [0014] of Francis: box office computers
 connected to central processor)
- a rules set maintained by said central exchange and adapted for control
 by said affiliates whereby said affiliates can individually identify goods
 and/or services to be shown on their respective websites and the websites
 of other affiliates and said affiliates can specify conditions for selling such
 goods and/or services (at least paragraph figure 6-7 of Harmon: central
 exchange determines display of ticket offers)

10/606,086

Art Unit: 3625

3. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Francis in view of Harmon, Joao and Hagen as applied to claim 9 above, and further in view of Satchell.

Francis, Harmon, Joao and Hagen disclose the claimed invention except for:

 a shipping manager feature adapted for providing transaction data to a carrier for shipping goods to customers.

Satchell teaches it is known to forward shipping information to a carrier to ship goods to customers (at least paragraph [0052]: out-of-stock product ordered and shipped to customer) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Francis, Harmon, Joao and Hagen, with the product shipping, as taught by Satchell, since such a modification would have provided a more efficient commerce system through immediate shipping (at least paragraph [0052] of Satchell).

10/606,086

Art Unit: 3625

4. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Francis in view of Harmon and Joao as applied to claim 14 above, and further in view of Satchell.

Francis, Harmon, and Joao disclose the claimed invention except for:

- providing a special order system enabling affiliates to sell non-inventory goods and/or services not in their possession
- distributing via the distributed network purchase requests for said noninventory goods and/or services.

Satchell teaches that it is known to include providing for ordering of non-inventory goods and distributing purchase orders for these goods (at least paragraph [0052]: out-of-stock products ordered and shipped) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Francis and Harmon, with the non-inventory goods ordering, as taught by Satchell, since such a modification would have provided a more efficient commerce system through immediate shipping (at least paragraph [0052] of Satchell).

10/606,086 Art Unit: 3625

5. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Francis in view of Harmon and Joao as applied to claim 14 above, and further in view of Anderson.

Francis, Harmon, and Joao disclose the claimed invention except for:

- enabling affiliate control of splitting of grouped goods and/or services according to predetermined procedures;
- offering such grouped goods and/or services according to such predetermined procedures.

Anderson teaches that it is known to include procedures for splitting grouped products and offering the products (at least abstract: unbundling of products) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the method, as taught by Francis, Harmon, and Joao with the splitting of grouped products, as taught by Anderson, since such a modification would have provided additional versatility in the ordering process by offering products in a different format than originally presented (at least paragraph [0009] of Anderson).

10/606,086 Art Unit: 3625

Response to Arguments

Applicant's arguments with respect to claims 1, 6, and 9-20 have been considered but are moot in view of the new ground(s) of rejection.

10/606,086
